

## Homework: Paginating Results

1. Add first and last buttons to the pagination block of products index.php page.
  - a. First button leads to the first page – the page with the first 6 products recorded in the DB.
  - b. Last button leads to the last page – the page with the last set of products /there may be 6 or less products in that page/.
  - c. If products recorded in the DB are less than the products displayed per page – the first and last buttons are not displayed on the page.
  - d. If products recorded in the DB are more than the number of products displayed per page – the first and last buttons are displayed.
  - e. If we are on the first page – only the last button is displayed.
  - f. If we are on the last page – only the first button is displayed.
